## ライティング（英文要約）

- 以下の英文を読んで、その内容を 45～55語 の英語で要約しなさい。
- 原文の語句をそのまま写さず言い換えること。具体例・数字・自分の意見は入れない。

## No.1 / ネット通販の広がり

These days, more and more people buy things on the internet instead of going to physical stores. Over the past several years, shopping online has quickly become a normal part of daily life for many people.

There are several good points to this change. First, online shopping is very convenient, because people can order goods at any time without leaving home. Second, it is often cheaper, as online stores have lower costs and offer a wider choice of products than local shops.

However, there are also some problems. One is that customers cannot touch or try items before buying, so the goods that arrive may not be what they expected. Another is that the large amount of packaging used for deliveries creates a lot of waste.

## 4 ライティング（英文要約）

● 以下の英文を読んで、その内容を 45～55語 の英語で要約しなさい。● 原文の語句をそのまま写さず言い換えること。具体例・数字・自分の意見は入れない。

### No.2 / 在宅勤務の広がり

In recent years, a growing number of companies have allowed their employees to work from home rather than coming to an office every day. This way of working has become much more common than it once was.

Working from home has several benefits. To begin with, employees save the time and money they once spent traveling to and from work each day. In addition, they can often choose their own hours, which makes it easier to balance their jobs with family life and other activities.

At the same time, this style of working has its drawbacks. One problem is that people who work alone at home may feel lonely and cut off from their coworkers. Another is that, without a clear line between the office and the home, some find it hard to stop working and relax.

### No.3 / 子どもへのスマホの低年齢化

Today, many parents give their children smartphones at a much younger age than they used to. It is now quite common to see even elementary school children carrying and using their own phones every day.

There are good reasons for this. For one thing, a phone lets parents contact their children easily and know that they are safe. For another, children can use phones to look up information and study, which can be helpful for their schoolwork.

On the other hand, there are worries about this trend. First, children may spend too many hours looking at their screens, leaving less time for exercise and sleep. Second, too much time on a phone can mean fewer face-to-face conversations with family and friends, which some experts believe is important for growing up.

### No.4 / 電気自動車の普及

Electric cars, which run on batteries instead of gasoline, are becoming increasingly popular in many countries around the world. Several governments are now encouraging people to switch from ordinary cars to electric ones.

This change has clear advantages. Most importantly, electric cars do not burn gasoline, so they produce no exhaust gases and help reduce air pollution. They are also much quieter than ordinary cars, which makes streets more pleasant and less noisy for the people who live nearby.

However, electric cars also have some weak points. For one thing, they are still quite expensive to buy, so not everyone can afford one. For another, there are not yet enough places to charge their batteries, which can make long trips difficult.

### No.5 / 調理済み食品の利用

More and more people today buy ready-made meals from supermarkets and convenience stores instead of cooking from scratch. These prepared foods have now become a common and convenient part of many busy lives.

Such meals offer some clear benefits. The main one is that they save a great deal of time, since there is no need to shop for ingredients or cook. They also come in a wide variety, allowing people to enjoy many different dishes easily.

There are, however, some downsides. One is that ready-made meals are often less healthy, because they can contain a lot of salt, fat, or sugar. Another is that they tend to be more expensive than meals cooked at home, and they create extra packaging waste.

### No.6 / 海外留学

Each year, a large number of students choose to study in a foreign country for part of their education, often for a year or a single term. Studying abroad has become a popular goal for many young people.

This experience has important benefits. First, living in another country is one of the best ways to improve a foreign language and learn about a different culture. Second, being far from home helps students become more independent and confident in solving problems on their own.

At the same time, studying abroad is not without difficulties. One is the high cost, as tuition, travel, and living expenses can be very large. Another is that students may feel homesick and lonely, especially at the beginning, when everything around them is unfamiliar.

### No.7 / ソーシャルメディア

Social media has become a major part of everyday life, with people of all ages using it to share photos, news, and messages. The number of users continues to grow every year.

There are several advantages to social media. To begin with, it lets people stay in touch with friends and family, even those who live far away. Moreover, it makes it easy to share useful information quickly and to learn about events happening around the world.

However, social media also has its problems. First, many users spend too much time on it, which can take time away from study, work, or sleep. Second, false information can spread quickly, and comparing oneself to others online can make some people feel unhappy.

- 以下の英文を読んで、その内容を 45～55語 の英語で要約しなさい。
- 原文の語句をそのまま写さず言い換えること。具体例・数字・自分の意見は入れない。

### No.8 / セルフレジ

Many supermarkets and shops have introduced self-checkout machines, which let customers scan and pay for their own goods without a cashier. These machines are now becoming a familiar sight in supermarkets and shops everywhere.

Self-checkout offers some clear advantages. For shoppers, it can be faster, as there are often more machines than staffed checkouts, so people wait in line for less time during busy periods. For stores, the machines can lower costs, since fewer staff are needed to serve customers.

There are, however, some disadvantages. One concern is that, as machines replace workers, there may be fewer jobs for people. Another is that some customers, especially older people, find the machines confusing and would prefer the help of a human cashier.

### No.9 / 制服

In many countries, students are required to wear school uniforms, while in others they may wear whatever they like. The question of whether uniforms are a good idea is one that schools and families often discuss.

Uniforms have several advantages. First, because every student wears the same clothes, no one feels left out for not having fashionable or expensive items, and there is less pressure to keep up with the latest styles. Second, uniforms save time and trouble in the morning, as students do not have to decide what to wear each day.

On the other hand, there are also disadvantages. One is that uniforms can be expensive for families to buy, especially as children grow and need new ones. Another is that wearing the same clothes as everyone else gives students little chance to express their own personality through what they wear.

### No.10 / オンライン授業

These days, many schools and universities offer classes over the internet, which students can take from home. Online learning has spread quickly and is now a common way to study.

This type of learning has clear benefits. To begin with, students can attend classes from anywhere, saving the time and money they would spend traveling to school. In addition, lessons can often be recorded, so learners are able to watch them again at a time that suits them.

There are, however, some problems. One is that studying alone at a screen can make it harder to stay focused and to ask questions, and students may have fewer chances to talk with classmates. Another is that online classes require a good internet connection and a suitable device, which not everyone has.

### No.11 / 外国語の早期学習

More and more parents want their children to start learning a foreign language, such as English, from a very young age. Some schools now begin teaching foreign languages in the early years of elementary school.

There are good reasons to start early. First, young children are thought to pick up the sounds and rhythms of a new language more easily than older learners. Second, starting young gives children many more years to practice, so they have more time to become truly skilled before they grow up.

However, some people are not so sure. One worry is that, if a foreign language is taught too soon, young children may become confused while they are still learning their own language. Another is that long study hours can put pressure on small children and leave them less time to play and rest.

### No.12 / AIアシスタント

Computer programs powered by artificial intelligence, or AI, are now able to answer questions, write text, and help with many everyday tasks. More and more people are starting to use these AI assistants in their daily lives.

These tools offer real benefits. For one thing, they can do certain tasks very quickly, such as finding information or writing a first draft, which saves people a lot of time. For another, they are available at any hour, so users can get help whenever they need it, even late at night.

At the same time, there are concerns. One is that AI sometimes gives answers that are wrong or out of date, and users may believe them without checking. Another is that, if people depend on AI too much, they may stop thinking carefully for themselves or practicing important skills.

### No.13 / キャッシュレス決済

In many places, people are paying for things with smartphones or cards instead of cash. This kind of cashless payment is becoming more and more popular in shops, restaurants, and on public transport.

Paying without cash has clear advantages. First, it is fast and easy: customers can simply tap a card or phone, without counting out coins and notes. Second, because every payment is recorded, people can easily check how much they have spent and keep track of their money.

However, there are also some drawbacks. One is that, because spending feels less real, people may find it easy to buy too much and waste money. Another is that, if the payment system or a person's phone stops working, they may be unable to pay at all, and some people still cannot use these methods.

### No.14 / エコバッグ／レジ袋削減

To cut down on plastic waste, many shops now charge for plastic bags or no longer give them out, and more people are bringing their own reusable bags when they go shopping. This change has spread to many countries.

There are clear benefits to using reusable bags. First, it greatly reduces the number of plastic bags that are thrown away, which means less plastic waste ends up in rivers and oceans. Second, this helps protect sea animals, which can be harmed when they swallow plastic or become tangled in it.

However, the change is not always easy. One problem is that people often forget to bring their bags and end up buying more, so they gather more bags than they need. Another is that making strong reusable bags uses energy and materials, so a bag must be used many times before it is truly better for the environment.

### No.15 / 住宅用ソーラーパネル

A growing number of people are putting solar panels on the roofs of their houses to make their own electricity from sunlight. Governments in many countries encourage this as a way to use cleaner energy.

Home solar panels have important benefits. First, they produce electricity from the sun without burning fuel, so they create no pollution and help fight climate change. Second, although the panels cost money at first, they can lower a family's electricity bills over the years, sometimes saving a large amount.

There are, however, some disadvantages. One is that buying and installing solar panels is expensive, and it can take many years before the savings make up for this cost. Another is that the panels only make electricity when the sun is shining, so they produce little power on cloudy days or at night.

### No.16 / 週休3日制（4日勤務）

Some companies have begun trying a four-day work week, in which employees work one day less but still receive the same pay. The idea is attracting attention as people think more about the balance between work and life.

A shorter week has clear benefits. First, employees get an extra day of rest, which gives them more time for their families, hobbies, and health. Second, workers who are well rested often feel happier and more motivated, and some studies suggest they may even get the same amount of work done in less time.

However, the idea also has problems. One is that fitting the same amount of work into fewer days can leave employees feeling rushed and under pressure. Another is that a four-day week does not suit every kind of job, especially services like hospitals or shops that people need to use every day.

### No.17 / 観光の増加

Every year, more and more people travel to visit famous cities and beautiful places around the world. Thanks to cheaper flights and the internet, tourism has grown rapidly, and some popular spots now welcome huge numbers of visitors.

This growth brings clear benefits to the places people visit. First, tourists spend money on hotels, food, and shopping, which supports local businesses and creates many jobs. Second, when visitors and local people meet, both sides have a chance to learn about each other's cultures and ways of life.

However, large numbers of tourists can also cause problems. One is that popular areas become crowded and noisy, and visitors sometimes leave litter or damage important sites. Another is that, as an area becomes popular, prices for things like housing and food may rise, making life harder for the people who live there.

### No.18 / 自転車通勤・通学

In many cities, more people are choosing to ride bicycles to work or school instead of driving or taking the bus. Some towns are even building special bicycle lanes to make this easier and safer.

Cycling to work or school has several benefits. First, it is a good form of exercise, helping people stay fit and healthy as part of their daily routine. Second, it saves money on fuel and train tickets, and because bicycles produce no exhaust gases, it is also kinder to the environment.

However, there are also some drawbacks. One is that cycling on busy roads can be dangerous, especially where there are many cars and few bicycle lanes. Another is that bad weather, such as heavy rain or strong heat, can make the journey unpleasant, and riders may arrive feeling tired or sweaty.

### No.19 / ペットを飼うこと

Many families around the world keep pets, such as dogs and cats, as part of their household. For a lot of people, a pet is treated almost like a member of the family.

Having a pet can bring real benefits. First, pets are good company and can make their owners feel happier and less lonely; spending time with an animal may even help reduce stress. Second, caring for a pet can teach children responsibility, as they learn to feed it and look after it every day.

However, keeping a pet is not always easy. One problem is the cost, since owners must pay for food and for visits to the animal doctor, which can be expensive. Another is that pets need a lot of time and care, and it can be difficult to travel or be away from home for long.

### No.20 / 電子書籍

Instead of buying paper books, many people now read electronic books, or e-books, on phones, tablets, and special reading devices. E-books have become a popular way to enjoy reading.

E-books offer several advantages. First, a single small device can hold hundreds of books, so readers can carry a whole library wherever they go. Second, e-books can be bought and downloaded in seconds, and readers can change the size of the letters to make reading more comfortable.

However, e-books also have some disadvantages. One is that reading on a screen for a long time can tire the eyes, and a device needs to be charged, while a paper book never runs out of power. Another is that some readers simply miss the feel of holding a real book and turning its pages.

### No.21 / ポッドキャスト

Podcasts are audio programs that people can listen to on their phones, and they have become very popular in recent years. There are now podcasts on almost every topic, from news and science to comedy and history.

Listening to podcasts has clear benefits. First, because they are only sound, people can enjoy them while doing other things, such as commuting, exercising, or doing housework. Second, most podcasts are free and cover a huge range of subjects, so listeners can easily learn about new ideas in their spare time.

However, podcasts also have some weak points. One is that, because listeners are often busy doing something else, it can be easy to lose attention and miss important parts. Another is that anyone can make a podcast, so the information is not always correct, and listeners cannot ask questions as they could in a real conversation.

### No.22 / ボランティア活動

Many people give up some of their free time to do volunteer work, helping others without being paid. Volunteers do all kinds of things, from cleaning parks to helping at schools and caring for the elderly.

Volunteering brings benefits to everyone involved. First, it helps the community and people in need, providing support that might otherwise be missing. Second, volunteers themselves often gain a lot: they learn new skills, make new friends, and feel a real sense of purpose from helping others.

However, volunteering also has its difficulties. One is that it takes up time that people could spend on their own study, work, or family, which can be hard for busy people. Another is that some volunteer work can be tiring or emotionally difficult, especially when helping people who are sick or in serious trouble.

## No.23 / 家庭菜園

These days, more people are growing their own vegetables, either in a garden or in pots on a balcony. With interest in healthy eating rising, home vegetable growing has become a popular hobby.

Growing your own vegetables has clear benefits. First, the vegetables are very fresh and cost almost nothing once the plants are growing, and people know exactly how their food was grown. Second, gardening is an enjoyable hobby that gets people outdoors and active, which is good for both body and mind.

However, growing vegetables is not always simple. One problem is that it takes a lot of time and effort to plant, water, and care for the vegetables every day. Another is that success depends on the weather and on insects, so a great deal of work can sometimes be lost, and not everyone has enough space to grow much.

### No.24 / 中古品の購入

Buying secondhand goods, meaning things that someone else has used before, such as clothes, furniture, and books, has become increasingly common. Many people now look for used items in shops or on websites before buying anything new.

Buying used goods has clear advantages. First, secondhand items are usually much cheaper than new ones, so people can save a lot of money. Second, reusing goods instead of buying new ones helps the environment, because it cuts down on waste and on the resources needed to make new products.

However, buying secondhand also has drawbacks. One is that used items may be worn or damaged, and they often come with no guarantee, so they cannot easily be returned if there is a problem. Another is that it can be hard to find exactly what you want, since each used item is different and may sell quickly.

## No.25 / 学生のアルバイト

Many high school and university students take part-time jobs, working at places such as shops, restaurants, or cafés while they study. For a lot of young people, having a part-time job has become a normal part of student life.

Part-time work offers some clear benefits. First, students can earn their own money, which they can use for things they want or save for the future. Second, a job gives them useful experience, teaching them how to work with others, deal with customers, and take responsibility. These are skills that can help them later in life.

However, there are also some problems. One is that the hours spent working leave students less time and energy for their studies, which can affect their grades. Another is that part-time jobs can be tiring, especially when students try to balance work, school, and sleep all at once.

### No.26 / 防災訓練

In countries where earthquakes, fires, or other disasters can happen, schools, companies, and towns often hold disaster drills. During these drills, people practice what they would do if a real emergency took place.

Such drills have important benefits. First, by practicing in advance, people learn exactly what to do, so they are likely to act quickly and stay calmer if a real disaster strikes. Second, drills can reveal problems beforehand, such as exits that are hard to reach, allowing them to be fixed before any emergency happens.

However, disaster drills also have some downsides. One is that organizing them takes time and money, and they interrupt the normal work of schools and companies. Another is that if drills are repeated too often, or do not feel real, some people may stop taking them seriously and pay little attention.

### No.27 / 翻訳アプリ

Thanks to smartphones, people can now use translation apps that quickly turn one language into another. These apps have made it much easier to understand foreign words, whether while traveling or reading something online.

Translation apps offer real benefits. First, they let people communicate in places where they do not speak the local language, for example by asking for directions or reading a menu in a foreign country. Second, most apps are free and work in seconds, so anyone with a phone can get instant help at no cost.

However, these apps also have weak points. One is that their translations are not always accurate, especially with jokes, polite expressions, or sentences that have more than one meaning. Another is that, if people rely on apps too much, they may lose the motivation to study and truly learn a foreign language themselves.

## No.28 / 動画配信サービス

These days, many people watch films and television shows through streaming services on the internet, rather than on traditional television. With just a monthly fee, viewers can watch a huge number of programs whenever they like.

Streaming has clear advantages. First, it is very convenient: people can watch what they want, when they want, and pause or continue a program at any time, on a phone, computer, or TV. Second, streaming services offer an enormous choice of films and shows from all over the world, often for less money than a cinema ticket.

However, streaming also has its problems. One is that, as people sign up for several different services, the monthly fees can quickly add up and become expensive. Another is that, because so much is available, viewers may spend far too many hours watching, using up time they could have spent on other things.

## 4 ライティング（英文要約）

- 以下の英文を読んで、その内容を 45～55語 の英語で要約しなさい。
- 原文の語句をそのまま写さず言い換えること。具体例・数字・自分の意見は入れない。

### No.29 / 肉を減らす食生活

In recent years, more people have begun eating less meat, choosing meals based on vegetables, beans, and grains instead. Some do this for their health, and others because they are worried about the environment.

Eating less meat can bring real benefits. First, a diet with plenty of vegetables and less meat is often healthier, and may lower the risk of certain diseases. Second, it is better for the environment, because raising animals for meat uses large amounts of land and water and produces gases that warm the planet.

However, this change is not without difficulties. One is that people must plan their meals carefully to make sure they still get enough protein and other nutrients that meat usually provides. Another is that, when eating out or visiting friends, it can be hard to find suitable meals, which may feel inconvenient.

### No.30 / チームスポーツ

Many people, especially young people, take part in team sports such as soccer, basketball, or volleyball. Whether at school or in local clubs, playing on a team is a popular way to spend free time.

Team sports have clear benefits. First, they are a great form of exercise, helping players build strength and stay healthy. Second, playing on a team teaches important social skills: members learn to work together, support one another, and communicate, and they often make good friends in the process.

However, team sports also have some drawbacks. One is the risk of injury, as fast movement and physical contact can sometimes cause players to get hurt. Another is that joining a team takes a lot of time for practices and games, and some sports require money for equipment or club fees.
