I 次の英文を読んで設問に答えよ。

The New Problem with No Name

Now, more than ever, couples of all kinds are struggling to balance employment and family, their work lives and home lives. As a nation, we are collectively waking up to the importance of caregiving, to its value, for the present and for future generations. We are starting to fully realize its cost in terms of lost income, flattened careers, and tradeoffs between couples (heterosexual and same sex), as well as the particularly strenuous demands on single mothers and fathers. These realizations predated the pandemic but have been brought into sharp focus by it.

In 1963, Betty Friedan wrote about college-educated women who were frustrated as stay-at-home moms, noting that their problem “has no name.” Almost sixty years later, female college graduates are largely on _____ tracks, but their earnings and promotions — relative to those of the men they graduated with — continue to make them look like they’ve been betrayed. They, too, have a “problem with no name.”

But their problem goes by many names: sex discrimination, gender bias, glass ceiling, mommy track — take your pick. And the problem seems to have immediate solutions. We should coach women to be more _____ and train them to negotiate better. We need to expose managers’ implicit bias. The government should impose gender-parity mandates on corporate boards and enforce the equal-pay-for-equal-work doctrine.

Women in the US and elsewhere are crying out ever more loudly for such an answer. Their concerns are splattered across national headlines (and book jackets). Do they need more drive? Why aren’t women able to advance up the corporate ladder at the speed of their male _____? Why aren’t they compensated at the level their experience and seniority deserve?

More private doubts haunt many women, doubts that are shared in their

intimate partnerships or relegated to private discussions with close friends. Should you date someone whose career is just as time consuming as your own? Should you put off having a family, even if you're sure you want one? Should you freeze your eggs* if you aren't partnered by thirty-five? Are you willing to walk away from an ambitious career (maybe one you've been building toward ever since you took your SAT**) to raise kids? If you aren't, who will pack the lunches, pick up your child from swim practice, and answer the panic-inducing call from the school nurse?

Women continue to feel cheated. They _____ in their careers while earning less than their husbands and male colleagues. They are told that their problems are of their own doing. They don't compete aggressively enough or negotiate sufficiently; they don't claim a seat at the table, and when they do, they don't ask for enough. But women are also told that their problems are *not* their own doing, even as the problems are their undoing. They are taken advantage of, discriminated against, harassed, and excluded from the boys' club.

All these factors are real. But are they the root of the problem? Do they add up to the major difference between men and women in their salaries and careers? If they were all _____ fixed, would the world of women and men, the world of couples and young parents, look completely different? Are they collectively the "new problem with no name"?

Although lively public and private discourse has brought these important issues _____, we're often guilty of disregarding the enormous scale and long history of gender disparities. A single company slapped on the wrist, one more woman who makes it to the boardroom, a few progressive tech leaders who go on paternity leave — such solutions are the economic equivalent of tossing a box of Band-Aids to someone with a broken leg.

These responses haven't worked to erase the differences in pay between genders. And they will never provide a complete solution to gender inequality, because they treat only the symptoms. They will never enable women to achieve both career and family to the same degree as men. 賃金格差の根絶、あるいは縮

(7)

小を望むのであれば、まず、こうした挫折の根を深く掘り下げ、この問題にもっと正確な名前をつけなければならない: greedy work.

The greediness of work means that couples with children or other care (H) _____ would gain by doing a bit of specialization. Women will still pursue demanding careers. But one member of the couple will be on call at home, ready to leave at a moment's notice. That person will have the flexibility and will ordinarily not be expected to answer an e-mail or call at ten p.m. That parent will not have to cancel an appearance at soccer practice for work. The other parent, however, will be on call at work and do just the opposite. The potential impact on promotion, advancement, and earnings is obvious.

The value of greedy jobs has greatly increased with rising income inequality, which has soared since the early 1980s. Earnings at the very upper end of the income distribution have ballooned. The worker who jumps the highest gets an ever-bigger reward. The jobs with the _____ demands for long hours and the (I-1) _____ flexibility have paid disproportionately more, while earnings in other (I-2) _____ employments have stagnated. Thus, positions that have been more difficult for women to enter in the first place, such as those in finance, are precisely the ones that have seen the greatest increases in income in the last several decades.

Rising inequality in earnings may be one reason why the gender pay gap among college graduates has remained flat in the last several decades, despite improvements in women's credentials and positions. It may be the reason why the gender earnings gap for college graduates became larger than that between men and women of the entire population in the late 1980s and early 1990s. Women have been swimming upstream, holding their own but going against a strong current of income inequality.

Greedy work also means that couple equity has been, and will continue to be, discarded for increased family income. And when couple equity is _____ the (J) window, gender equality generally goes with it, except among same-sex unions. Gender norms that we have inherited get reinforced in a host of ways to allot more

of the childcare responsibility to mothers, and more of the family care to grown daughters.

*eggs : 卵子

1 次の各問の答えを①～④の中から選び、その番号をマークせよ。なお、(ア)については、その指示に従って答えること。

(A)の it が指すものは次のどれか。

- ① cost
- ② income
- ③ the pandemic
- ④ value

(B)の空欄に入れるべき最も適当なものは次のどれか。

- ① career
- ② retired
- ③ running
- ④ mommy

(C)の空欄に入れるべき最も適当なものは次のどれか。

- ① assertive
- ② agreeable
- ③ cooperative
- ④ effective

(D)の空欄に入れるべき最も適切なものは次のどれか。

- ① climbers
- ② employers
- ③ employees
- ④ counterparts

(E)の空欄に入れるべき最も適切なものは次のどれか。

- ① keep apart
- ② speak up
- ③ stay ahead
- ④ fall behind

(F)の空欄に入れるべき最も適切なものは次のどれか。

- ① illegally
- ② miraculously
- ③ incomparably
- ④ disgracefully

(G)の空欄に入れるべき最も適切なものは次のどれか。

- ① to light
- ② to night
- ③ to a stop
- ④ to a level

(H)の空欄に入れるべき最も適切なものは次のどれか。

- ① careers
- ② occupations
- ③ employment
- ④ responsibilities

(I) (I-1)と(I-2)に入る正しい組み合わせの単語は次のどれか。

- ① greatest, least
- ② greatest, greatest
- ③ least, greatest
- ④ least, least

(J)の空欄に入れるべき最も適当なものは次のどれか。

- ① thrown by
- ② thrown out
- ③ thrown away
- ④ through

(ア) 下線部「賃金格差の根絶、あるいは縮小を望むのであれば、まず、こうした挫折の根を深く掘り下げ、この問題にもっと正確な名前をつけなければならない」を英訳すると、たとえば次のような英文になる。

If we want to erase or (1) the pay (2), we must first plunge deeper toward the root of these (3) and (4) the problem a more (5) name

上記の英文には空所が5つある。適切な語で空所を補うこと。ただし、各下線部に1語ずつ書くこと。また次の〔 〕内の単語は、必ず1度ずつ用いること。

[narrow, accurate, gap, setbacks]

2 本文の内容に照らし、次の各問の答えを①～④の中から選び、その番号をマークせよ。

(K) What is the “new problem with no name”?

- ① mommy track
- ② lack of negotiation
- ③ gender disparities
- ④ greedy work

(L) The writer says that some couples “would gain by doing a bit of specialization.” What does she imply?

- ① Couples should focus specifically on building an equal partnership.
- ② Both partners can pursue demanding careers provided that they have specialized knowledge.
- ③ One partner should specialize on home, and the other on their career.
- ④ Whether working in the office or at home, both partners should specialize in becoming flexible.

(M) According to paragraph 2, what can be said about college educated women?

- ① The situations that college educated women are in has not changed for the past 60 years.
- ② Current college educated women earn more money compared to men and get promoted more often than in 1963.
- ③ College educated women, in 1963, were happily taking care of their children at home.
- ④ Despite improvements over the past 60 years, the prospects of college educated women are poor compared with men.

(N) What is NOT mentioned in the article?

- ① Women are demanding solutions to gender pay inequality.
- ② The problem of balancing personal and work life has been difficult for women for a long time.
- ③ The government has introduced successful mandates to enforce pay equality between men and women.
- ④ Women's educational level and positions at work have been improving.

(O) Which of the following would the writer probably agree with?

- ① Despite improvements in earnings in society in general, gender discrimination means that women earn less than in the past.
- ② Women now have better and higher paid jobs than in the past, but this is due mainly to women working harder in a climate of gender equality.
- ③ Improvements in women's qualifications and positions appear to have been offset by growing differences between high and low-paid work.
- ④ Couple equity should be discarded in order to increase family income and ensure that childcare and other responsibilities are fulfilled, and future generations of daughters educated.

(以下の問題Ⅱ、Ⅲ、Ⅳについては、解答用紙の裏面にマークすること。)

Ⅱ 次の英文を読んで設問に答えよ。

Why Social Media Sucks

When I ask people which category of apps they find the most problematic, social media is the most common response. Like junk food, the content of these apps is hard to stop ^(A) _____, even when you're aware that it's making you feel sick.

It should make you feel sick. From its deliberately addictive design to its surveillance-based business model, social media represents an example of "Trojan horse design": it's meant to manipulate us into doing and sharing things we otherwise would not — often with negative effects on our mental health and society at large. And once you understand the forces behind social media, you may begin to think differently about many of the other apps and features on your phone, too.

Let's start with a question: have you ever wondered why social media apps are all free? It's not ^(B) _____ their creators are driven by a generous urge to help the world share selfies. It's because we are not actually the customers, and the social media platform itself is not the product.

Instead, the customers are advertisers. And the product being sold is our attention.

Think about it: The more attention we devote to Facebook or Twitter or a dating app or other social media, the more chances there are for the program to show us a sponsored post. And the more information we voluntarily post, the more personalized, attention-stealing, and profitable (for the social media company) the sponsored posts and ads will be.

In the words of Dopamine Labs founder Ramsay Brown, "You don't pay for Facebook. Advertisers pay for Facebook. You get to use it for free because your

eyeballs are what's being sold there."

As we _____ earlier, the prize these advertisers are after is "engagement,"
(C) which is the measure by which companies evaluate the number of clicks, likes, shares, and comments associated with their content. Engagement is sometimes referred to as "the currency of the attention economy," and advertisers are willing to pay a lot of money for it. Global ad spending on social media in 2016 was \$31 billion, almost double what it was just two years before.

In other words, every moment of attention we spend scrolling through social media is attention spent making money for someone else. The numbers are _____ : a New York Times analysis calculated that as of 2014, Facebook users
(D) were spending a collective 39,757 years' worth of attention on the site, every single day. It's attention that we didn't spend on our families, or our friends, or ourselves. And just like time, once we've spent attention, we can never get it back.

This is a really big deal, because our attention is the most valuable thing we have. We experience only what we pay attention to. We remember only what we pay attention to. When we decide what to pay attention to in the moment, we are making a broader decision about how we want to live our lives.

To be clear, there is nothing wrong with spending your time on social media (or on any other app). There is also nothing wrong with a designer trying to make an app that's fun, engaging, and profitable. But as users, we should be using our apps because we've made a conscious choice to do so—not because of manipulative psychological tricks that are meant to make money for someone else.

Once you're aware of the motives behind social media platforms—namely, attention _____ and information _____—you'll begin to notice how
(E-1) (E-2) these motives are incorporated into their designs.

As we've discussed, "Like" buttons and comment features aren't just there to help us connect with other people; they're there because adding data collection to social interactions is a guaranteed way to keep us going back to see our "score."

Similarly, it would be easy for social media apps to be built with optional

“stopping cues” to help us control our consumption. An app could give you the choice to see posts only from the last hour or day, or to set a limit for how much time you want to spend looking at your feed. But providing options like this might reduce “engagement.” So instead, the feeds are deliberately designed to be endless. And even though we know that we will never “finish” our feeds, we keep scrolling, in pursuit of the dopamine hits that we get from every new post.

Adapted from *How to Break Up with Your Phone: The 30-Day Plan to Take Back Your Life* by Catherine Price, 2018.

1 次の各問の答えを①～④の中から選び、その番号をマークせよ。

(A)の空欄に入れるべき最も適切なものは次のどれか。

- ① eating
- ② reading
- ③ debating
- ④ consuming

(B)の空欄に入れるべき最も適切なものは次のどれか。

- ① although
- ② because
- ③ unless
- ④ what

(C)の空欄に入れるべき最も適切なものは次のどれか。

- ① touched
- ② touched base
- ③ touched down
- ④ touched upon

(D)の空欄に入れるべき最も適切なものは次のどれか。

- ① astonishing
- ② correct
- ③ exaggerated
- ④ hidden

(E) (E-1)と(E-2)に入る正しい組み合わせの単語は次のどれか。

- ① attracting, sorting
- ② lagging, screening
- ③ getting, developing
- ④ stealing, gathering

2 本文の内容に照らし、次の各問の答えを①～④の中から選び、その番号をマークせよ。

(F) What does the writer mean by saying social media is “an example of ‘Trojan horse design’”?

- ① Social media takes us on a ride that makes us feel as sick as riding an uncontrollable horse.
- ② Social media hides its true purpose of surveillance within attractive apps just as Greek soldiers hid in a horse to enter Troy.
- ③ Social media, like the Trojan horse, depends on people becoming addicted to its beauty and unable to resist.
- ④ Social media promotes itself as using Trojan horse design in order to overcome negative social and mental effects.

(G) According to the article, what is the product of free social media applications?

- ① advertisers
- ② social media users' attention
- ③ people using the applications
- ④ social media companies

(H) The money spent for global ads on social media in 2014 is estimated at about:

- ① \$10 billion
- ② \$16 billion
- ③ \$29 billion
- ④ \$60 billion

(I) What would social media companies most likely think about stopping cues?

- ① Stopping cues would be a great innovation for the future.
- ② Stopping cues would limit the amount of time individuals spent using apps.
- ③ They think stopping cues would increase their profits.
- ④ Stopping cues would provide useful options for more engagement.

(J) What statement would the writer probably most agree with?

- ① Social media, like junk food, can lead to people feeling physically ill.
- ② The way that social media works will definitely be improved soon.
- ③ Social media companies use dishonest ways to make people spend their time online.
- ④ Social media is profitable, so there is nothing wrong with these apps.

Ⅲ 以下の空欄に入れるべき最も適切なものは次のどれか。

(A) _____ on his assignment since 4 p.m., Adam decided that it was finally time to take a break and try to watch the end of the baseball game.

- ① Have work
- ② Having work
- ③ Have worked
- ④ Having worked

(B) If you look to your left, you will see the National Kabuki Theater. Please be patient, you will have a _____ to go back there and take some photographs later on.

- ① time
- ② walk
- ③ chance
- ④ certainty

(C) The student _____ the problem with her homeroom teacher.

- ① discussed
- ② discussed of
- ③ discussed on
- ④ discussed about

(D) The dog _____ when her owner left the house.

- ① saw sad
- ② saw sadly
- ③ looked sad
- ④ looked sadly

(E) By January, I _____ in Japan for six months.

- ① will be
- ② will have been
- ③ am going
- ④ am going to go

(F) Do you know if Nancy wants to _____ Bob?

- ① marry
- ② marry with
- ③ be married
- ④ get married

(G) _____ of deer walking on the road.

- ① Caution
- ② Beware
- ③ Dangerous
- ④ Watch out

(H) The metals used in the manufacture of computers are _____ natural resources that should not be wasted.

- ① value
- ② valueless
- ③ invaluable
- ④ unvaluable

(I) The event will be held on the 12th ...Whoops! Sorry! _____ the 20th of March.

- ① I said
- ② I mean
- ③ Rather
- ④ Instead

(J) A: How is the brainstorming for the new project going?

B: Not terribly well. We are _____ of ideas.

- ① running into
- ② running out
- ③ running away
- ④ running through

(K) Catherine had her car _____ while she was shopping.

- ① steal
- ② steals
- ③ stolen
- ④ stealing

(L) I feel like _____ out for dinner tonight.

- ① to go
- ② going
- ③ to have gone
- ④ I am going

(M) When I was a child, I _____ to play at the park near my house.

- ① liked
- ② had liked
- ③ have liked
- ④ have been liking

(N) Going _____ to study can be fun and challenging.

- ① overseas
- ② oversea
- ③ to overseas
- ④ to oversea

(O) My teacher was too busy to answer my question, so she said she would _____ back to me in the next lesson.

- ① get
- ② reply
- ③ take
- ④ return

IV 次の(A)~(E)の空欄に入れるものとして、①~⑧の中から適切な文を選んで、その番号をマークせよ。ただし、同じ文を2度以上使ってはならない。

Lyli pays a surprise visit to her friend Daisy who has just returned from a bicycle trip to France.

Lyli: Hello Daisy. How was the trip to France? I saw your pictures on Instagram. It looked amazing.

Daisy: Oh, hi Lyli! Yeah, thanks. It was quite a ride and the heat during the day was pretty fearsome, but the roadside support really kept us going.

Lyli: What do you mean? _____
(A)

Daisy: By myself? No, far from it. For one thing, I was riding a tandem with my partner Harry, and for another there were over 600 other participants.

Lyli: Over 600? That's more than the Tour de France. It must have been pretty crowded on the road.

Daisy: Well, it certainly would have been if we had all started at once. But, everyone's start times were staggered so that we started in a pretty large group which gradually spread out over the first 100 kilometers or so.

Lyli: What do you mean? You rode more than 100 kilometers?

Daisy: _____ The total distance of the event was 1,200 kilometers.
(B)

Lyli: Oh, I see, you mean it was a three-week event like the Tour de France?

Daisy: Oh no. There was a time limit of ninety hours including eating, sleeping and checking in at the controls.

Lyli: I see. That sounds a lot more intense than I imagined from the pictures.

Daisy: It was hard in a way. But there is something wonderful about just pedaling nonstop through the French countryside with the locals cheering us on.

Lyli: _____ I wonder if they knew you were riding so far.
(C)

Daisy: Yes, everyone in the area knew about the event because information about it is publicized on TV a long time in advance. Besides, it is an event with a history that predates even the Tour de France.

Lyli: So how come you were able to ride this famous event? _____^(D)

Daisy: Sure, you don't have to be a professional, but you have to complete officially sanctioned rides of 200, 300, 400, and 600 kilometers in the same year in order to qualify. And of course, your bike must be roadworthy and have good lights for riding at night and a bell.

Lyli: I see. So, did you ride all those miles together with Harry?

Daisy: It's kilometers not miles. But yes, we did most of our training and all the qualifying rides together on the tandem.

Lyli: _____ Didn't you ever argue when things went wrong?^(E)

Daisy: Strangely enough, no. Although there are all kinds of ups and downs, and sometimes our personal ups and downs don't always coincide, we usually support each other and both just love riding a bicycle made for two.

Lyli: How sweet! You make me kind of jealous!

- ① I thought professional sanctions were in place.
- ② I imagine that was quite a bit of time together.
- ③ Is it OK for me to ride by myself?
- ④ Oh yeah, way more.
- ⑤ I thought you were travelling by yourself?!
- ⑥ Can anyone take part?
- ⑦ Well, that was nice of them.
- ⑧ I wish that French people were more cheerful.
