2

英検2級 一次試験（筆記） 最終総合模試 第2回

大問1～5 / 本番形式

THINKING 総合模試 | 本番そっくりの構成で実戦演習。

- ・ **大問1** 短文の語句空所補充（17問）／**大問2** 長文の語句空所補充（6問）
- ・ **大問3** 長文の内容一致選択（8問）／**大問4** 英文要約／**大問5** 意見論述
- ・ 解き終わったら **解答・解説編** で答え合わせと弱点確認を。

※ リスニングは音声が必要なため別途。本冊子は一次試験の筆記パートです。

1

次の (1) から (17) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

- (1) The new shopping mall is expected to _____ many visitors from other cities.
1 waste 2 reduce 3 protect 4 attract
- (2) What is your _____ on working from home?
1 visit 2 voice 3 view 4 value
- (3) I really _____ all the help you gave me during my illness.
1 celebrate 2 concentrate 3 communicate 4 appreciate
- (4) The _____ man donated a large amount of money to build a new hospital.
1 healthy 2 weekly 3 weighty 4 wealthy
- (5) Could you do me a _____ and lend me your dictionary for a few minutes?
1 flavor 2 favor 3 favorite 4 fever
- (6) The company had serious _____ problems and could not pay its workers' salaries.
1 national 2 personal 3 natural 4 financial
- (7) After her _____ from college, she found a good job at a famous company.
1 gradation 2 graduation 3 generation 4 calculation
- (8) Drinking enough water every day is _____ for keeping your body healthy.
1 visual 2 virtual 3 vital 4 vivid
- (9) The police used the footprints to _____ the path the missing child had taken.
1 trade 2 trace 3 train 4 treat
- (10) The popular concert tickets _____ within just a few hours of going on sale.
1 ran out 2 gave away 3 sold out 4 put off
- (11) He worked very hard and was always polite, so he was soon _____ his new manager.
1 in search of 2 in favor with
3 in the middle of 4 in spite of
- (12) We had to _____ the picnic until next weekend because of the heavy rain.
1 put off 2 put on 3 put up 4 put out
- (13) A: Are you excited about the trip to Australia? B: Yes! I'm really _____ seeing the kangaroos.
1 looking down on 2 looking forward to
3 looking up to 4 looking after
- (14) The hikers had to turn back because they had _____ water halfway up the mountain.
1 run out of 2 taken part in
3 got along with 4 caught up with

(15) If I _____ more time tomorrow, I would help you finish the report.

1 have

2 had

3 will have

4 have had

(16) The woman _____ is talking with the teacher is my aunt.

1 which

2 who

3 whom

4 whose

(17) A: Look at that boy _____ by the dog over there. B: Oh, he looks so happy playing with it.

1 chase

2 chasing

3 chased

4 to chase

2

次の英文 [A], [B] を読み, その文意にそって (18) から (23) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

A

The Repair Café

Many people throw away broken items such as lamps, clothes, and small machines because they do not know how to fix them. (18), these items often become waste even when only a small part is broken. To change this, a woman in the Netherlands started an event called the Repair Café, where people bring broken things and fix them with the help of skilled volunteers.

At a Repair Café, visitors do not simply hand over their items. Instead, they sit with a volunteer and learn how the repair is done. Because of this, (19). Many people who once felt helpless discover that fixing things is not as difficult as they had thought.

The idea has spread to many countries, and thousands of Repair Cafés now exist around the world. They help reduce (20) and also bring neighbors together. People who meet at these events often share advice, save money, and protect the environment at the same time.

- | | | | | |
|------|---|-------------|---|-------------|
| (18) | 1 | For example | 2 | In contrast |
| | 3 | As a result | 4 | By chance |

- (19)
- 1 visitors gain useful skills of their own
 - 2 the volunteers do all the work alone
 - 3 the items are sent to a factory
 - 4 the café charges a high fee

- (20)
- 1 the number of volunteers
 - 2 the speed of repairs
 - 3 the price of new tools
 - 4 the amount of waste

B

How Bees Talk

When a honeybee finds a good source of food, it needs to tell the other bees in the hive where it is. Bees cannot speak, so they share this information in a surprising way: **(21)**. By moving its body in a special pattern, often called a "waggle dance," a single bee can describe the exact direction and distance of the flowers it has found.

The dance carries a lot of information. The direction in which the bee moves shows the direction of the food compared to the sun. The length of the dance shows **(22)**. A longer dance means the food is farther away, while a shorter one means it is close to the hive. The bee may also repeat the dance many times so that the message is clear to everyone nearby.

Other bees watch the dance closely and then fly straight to the food. This clever system allows the whole hive to gather food quickly and efficiently. **(23)**, the waggle dance is one of the most amazing examples of communication in the animal world.

-
- | | | | | |
|-------------|----------|-----------------------|----------|-------------------|
| (21) | 1 | by making loud sounds | 2 | by changing color |
| | 3 | by drawing maps | 4 | through dance |
-

- | | | |
|-------------|----------|---------------------------|
| (22) | 1 | how dangerous the trip is |
| | 2 | how far the food is |
| | 3 | how old the bee is |
| | 4 | how cold the weather is |
-

- | | | | | |
|-------------|----------|-------------|----------|------------|
| (23) | 1 | In fact | 2 | However |
| | 3 | By contrast | 4 | Until then |

3

次の英文 [A], [B] の内容に関して、(24) から (31) までの質問に対して最も適切なもの、または文を完成させるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

A

From: Lisa Tanaka <l.tanaka@brightsystems.com>

To: Mark Reyes <m.reyes@brightsystems.com>

Date: March 3

Subject: Preparing for the Henderson Visit

Hi Mark, As you know, the team from Henderson Foods will be visiting our office next Thursday to discuss the new packaging project. I'd like you to take the lead in preparing for the meeting, since you know this client better than anyone else on the team.

There are a few things to get ready. First, please update the slides with the latest sales figures from February—the old numbers are now out of date. Second, the visitors mentioned that they are especially interested in our eco-friendly materials, so please prepare two or three samples to show them. I've asked the design team to give you anything you need.

Could you also book the large meeting room for the whole afternoon? We may need extra time, and I don't want to be rushed. If you run into any problems or need more help, let me know by Wednesday at the latest. Thanks for taking this on—I'm confident the visit will go well with you leading it. Best, Lisa

(24) Why does Lisa want Mark to lead the preparations?

- 1 Because he designed the new packaging himself.
- 2 Because the other team members are too busy.
- 3 Because he is more familiar with the customer than his coworkers.
- 4 Because he asked to be in charge of the meeting.

(25) One thing Mark needs to do is

- 1 refresh the presentation with last month's sales data.
- 2 remove all information about eco-friendly materials.
- 3 create a brand-new design for the packaging.
- 4 contact Henderson Foods to change the date.

(26) What does Lisa ask Mark to do about the meeting room?

- 1 Move the meeting to a different office.
- 2 Check whether the room has enough chairs.
- 3 Cancel the room if the visit is delayed.
- 4 Reserve the large room for the entire afternoon.

B

The Return of the Wolves

Yellowstone National Park, in the United States, is home to many kinds of wildlife. About a hundred years ago, however, the park lost one of its most important animals: the gray wolf. People at the time saw wolves as dangerous pests that killed farm animals, so hunters were paid to get rid of them. By the 1920s, the wolves of Yellowstone had been completely wiped out.

At first, this seemed like good news for other animals, such as elk, a kind of large deer. With no wolves to hunt them, the elk population grew quickly. But this created a new problem. The huge number of elk ate almost all the young trees and plants, especially along the rivers. Without these plants, the land began to change, and many other animals that depended on them started to disappear.

For many years, scientists argued about whether wolves should be brought back. Finally, in 1995, a small number of wolves were captured in Canada and released into Yellowstone. No one was quite sure what would happen. The hope was that the wolves would reduce the elk population and help bring the park back into balance.

The results surprised even the scientists. As expected, the wolves hunted the elk, so their numbers fell. More importantly, the elk became more careful and avoided open areas near rivers where they could easily be caught. In these areas, young trees were finally able to grow tall again. Birds returned to the new trees, and beavers, which eat wood, came back too. The beavers built dams, which changed the way the rivers flowed.

The return of the wolves showed scientists something important: removing or adding a single animal can change a whole natural system in ways that are hard to predict. The wolves did not just affect the elk; they helped bring back plants, birds, and beavers, and even reshaped the rivers. Today, the story of Yellowstone's wolves is used around the world as an example of how closely living things are connected.

(27) Why were the wolves removed from Yellowstone?

- 1 Because they were taken to another park.
- 2 Because there was not enough food for them.
- 3 Because people believed they were a threat to their farm animals.
- 4 Because they had caught a disease.

(28) What problem did the growing elk population cause?

- 1 They destroyed much of the new plant life, especially near the rivers.
- 2 The elk attacked visitors to the park.
- 3 The elk moved away from the park.
- 4 The elk became too few in number.

(29) What did scientists hope the returning wolves would do?

- 1 Increase the number of elk.
- 2 Make the park more dangerous.
- 3 Bring more tourists to Yellowstone.
- 4 Reduce the elk population and restore balance.

(30) According to the passage, what happened after the wolves returned?

- 1** The rivers dried up completely.
- 2** Young trees were able to grow tall again.
- 3** All the birds left the park.
- 4** The elk began to spend more time near the rivers.

(31) Which of the following is true?

- 1** The wolves had no effect on any animals except the elk.
- 2** Scientists were certain about what would happen when the wolves returned.
- 3** The elk population grew even larger after the wolves returned.
- 4** Bringing back the wolves changed many parts of the park's natural system.

ライティング（英文要約）

- 以下の英文を読んで、その内容を 45～55語 の英語で要約しなさい。● 原文の語句をそのまま写さず言い換えること。

In recent years, a growing number of companies have allowed their employees to work from home rather than coming to an office every day. This way of working has become much more common than it once was.

Working from home has several benefits. To begin with, employees save the time and money they once spent traveling to and from work each day. In addition, they can often choose their own hours, which makes it easier to balance their jobs with family life and other activities.

At the same time, this style of working has its drawbacks. One problem is that people who work alone at home may feel lonely and cut off from their coworkers. Another is that, without a clear line between the office and the home, some find it hard to stop working and relax.

YOUR SUMMARY

語数（ 語）／目安 45～55語
