4

英検2級 一次試験（筆記） 最終総合模試 第4回

大問1～5 / 本番形式

THINKING 総合模試 | 本番そっくりの構成で実戦演習。

- ・ **大問1** 短文の語句空所補充（17問）／**大問2** 長文の語句空所補充（6問）
- ・ **大問3** 長文の内容一致選択（8問）／**大問4** 英文要約／**大問5** 意見論述
- ・ 解き終わったら **解答・解説編** で答え合わせと弱点確認を。

※ リスニングは音声が必要なため別途。本冊子は一次試験の筆記パートです。

次の (1) から (17) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

- (1) Farmers use _____ products to protect their crops from insects.
1 natural 2 physical 3 medical 4 chemical
- (2) The factory sends its _____ to stores all over the country.
1 goods 2 foods 3 goals 4 woods
- (3) This old painting is very _____, so we keep it in a safe place at home.
1 variable 2 valuable 3 valid 4 vacant
- (4) The car was moving at a fast _____, so the driver could not stop in time.
1 rare 2 race 3 gate 4 rate
- (5) The students in this class come _____ from Asian countries such as Japan and China.
1 rarely 2 mainly 3 clearly 4 kindly
- (6) This warm sweater is made of pure _____ from local sheep.
1 pool 2 tool 3 wool 4 cool
- (7) The city built a new shelter to provide warm beds for _____ people during winter.
1 helpless 2 homeless 3 harmless 4 careless
- (8) During the festival, the actor wore a colorful _____ over his face.
1 mark 2 mass 3 mask 4 task
- (9) Dolphins are very _____ animals that can learn many tricks quickly.
1 independent 2 intelligent 3 intermediate 4 international
- (10) This new project is mainly _____ protecting the environment in our city.
1 satisfied with 2 responsible for
3 concerned with 4 filled with
- (11) A huge fire suddenly began to _____ in the old factory late at night.
1 break down 2 break out 3 break in 4 break off
- (12) The meeting was _____ until next week because the manager was sick.
1 put off 2 put on 3 put up 4 put away
- (13) A: Are you excited about the trip to Okinawa? B: Yes! I'm really _____ seeing the beautiful sea.
1 looking after 2 looking for
3 looking forward to 4 looking down on
- (14) We had to stop the car because we _____ gas in the middle of the mountains.
1 ran out of 2 ran into 3 ran after 4 ran over

(15) If I _____ more time yesterday, I would have visited the old castle.

1 have

2 had had

3 will have

4 have had

(16) The woman _____ lives next door teaches English at a high school.

1 which

2 who

3 whom

4 what

(17) A: This is the most exciting movie I have ever seen! B: I agree. I have never seen _____ interesting one.

1 so

2 very

3 such an

4 as an

2

次の英文 [A], [B] を読み, その文意にそって (18) から (23) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

A

A Library for Seeds

In a small town, a group of gardeners noticed that many people wanted to grow their own vegetables but could not afford to buy seeds every year. To help with (18), they created a "seed library" inside the public library. Instead of books, this library lends packets of seeds to anyone who wants them.

The system is simple. Members borrow a few seed packets, plant them, and grow vegetables at home. At the end of the season, (19). These new seeds are then shared with other members the following year, so the library never runs out.

The seed library has become very popular. (20), it has encouraged neighbors to share gardening tips and to grow rare vegetables that are hard to find in shops. Some members say the project has made their whole community healthier and more connected.

- (18)
- 1 a lack of fresh books
 - 2 a shortage of gardeners
 - 3 the loss of the library
 - 4 the high cost of seeds

- (19)
- 1 they buy more seeds from a store
 - 2 they collect seeds from their own plants and return some
 - 3 they throw away the old packets
 - 4 they stop using the library

- (20)
- | | |
|---------------|---------------|
| 1 However | 2 By contrast |
| 3 In addition | 4 Until then |

How Geckos Climb Walls

Geckos are small lizards that can run up smooth walls and even walk across ceilings without falling. For a long time, people wondered how they could do this. Some thought the geckos used a kind of glue or tiny hooks, but **(21)**. The real secret lies in the special structure of their feet.

The bottom of a gecko's foot is covered with millions of tiny hairs, far too small to see. These hairs are so close to the surface of the wall that (22). This weak force, multiplied across millions of hairs, is strong enough to hold the whole gecko in place.

Scientists have copied this idea to design new kinds of sticky tape and gloves that can grip smooth surfaces without leaving any mark. **(23)**, studying a small lizard's feet has led to useful inventions. Learning from nature in this way is becoming more and more common in science.

- (21)**
- 1 both ideas were true
 - 2 the geckos used glue
 - 3 neither idea was correct
 - 4 the walls were sticky

- (22)
- | | |
|---|----------------------------------|
| 1 | they create a tiny pulling force |
| 2 | they push the gecko away |
| 3 | they make the wall dirty |
| 4 | they produce a loud sound |

- (23)**
- | | | | |
|----------|------------|----------|-------------|
| 1 | However | 2 | By contrast |
| 3 | Until then | 4 | In this way |

次の英文 [A], [B] の内容に関して、(24) から (31) までの質問に対して最も適切なもの、または文を完成させるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

A

From: Coach David Owens <coach@citytennisclub.com>

To: Club Members <members@citytennisclub.com>

Date: September 1

Subject: New Practice Schedule from October

Dear Members, I hope you all enjoyed the summer season. I am writing to tell you about our new practice schedule, which will begin on October 1. We have made some changes based on the feedback many of you gave us at the end of last term.

The biggest change is that we will now offer two evening practices each week, on Tuesdays and Thursdays, instead of just one. Several members told us that the single weekend practice was often too crowded, so we hope the extra evening sessions will give everyone more court time. The Saturday morning practice will continue as usual for those who prefer weekends.

Because the courts can only hold a limited number of players, we ask all members to sign up online for each session they plan to attend. This will help us avoid overcrowding and make sure there are enough coaches. Sign-ups for October will open on September 20. If you have any questions about the new schedule, feel free to speak to me at the club. See you on the court! David

(24) Why did the club change the practice schedule?

- 1 Because a new coach has joined the club.
- 2 Because the courts will be repaired soon.
- 3 Because fewer members are coming to practice.
- 4 Because members shared their opinions after the last term.

(25) The new schedule will include

- 1 only one practice on the weekend.
- 2 fewer practices than before.
- 3 two evening practices each week.
- 4 no weekend practice at all.

(26) What does Coach Owens ask members to do?

- 1 Pay a higher fee for evening practices.
- 2 Sign up online for each session they will attend.
- 3 Bring their own tennis balls to practice.
- 4 Choose between weekday and weekend membership.

B

Louis Braille and the Gift of Reading

Louis Braille was born in France about two hundred years ago. As a small child, he loved to play in his father's workshop, where leather goods were made. One day, while playing with a sharp tool, he hurt one of his eyes in an accident. The injury became infected, and the infection soon spread to his other eye. By the age of about five, Louis had become completely blind.

Although he could no longer see, Louis was a bright and curious boy. He won a place at a special school for blind children in Paris. At that time, blind students were taught to read using books with large, raised printed letters that they felt with their fingers. However, this method was very slow and difficult, the books were huge and heavy, and blind people could not use it to write at all.

Louis was determined to find a better way. He heard about a system used by soldiers called "night writing," which used raised dots and dashes so that messages could be read in the dark without a light. The army's system was too complicated to be useful, but it gave Louis an important idea. He realized that a code made of raised dots might allow blind people to read quickly by touch.

Working patiently for several years, Louis created a simple system using just six raised dots. By arranging these dots in different patterns, he could represent every letter of the alphabet, as well as numbers and even musical notes. The system was easy to feel with a single fingertip, and, unlike the old method, blind people could write it themselves using a simple tool. Louis finished his system while he was still a teenager.

At first, Louis's invention was not widely accepted, and some teachers refused to use it. Sadly, it became truly popular only after his death. Today, however, the system known as "braille" is used by blind people all over the world. Thanks to a boy who refused to give up, millions of people who cannot see are able to read and write for themselves.

(27) How did Louis Braille become blind?

- 1 He was born without the ability to see.
- 2 He caught an illness at his school.
- 3 He was injured in a car accident.
- 4 He hurt his eye while playing with a tool.

(28) What was one problem with the reading method used at Louis's school?

- 1 The books were small and easy to lose.
- 2 It was slow and could not be used for writing.
- 3 Only teachers were allowed to use it.
- 4 It required electric light to read.

(29) What gave Louis the idea for his system?

- 1 A book written by another blind student.
- 2 A new kind of printing machine.
- 3 A "night writing" system used by soldiers.
- 4 A suggestion from his teacher.

(30) What was special about the system Louis created?

- 1** Unlike the older method, it let blind people produce writing on their own.
 - 2** It used hundreds of different shapes.
 - 3** It could only be used to write music.
 - 4** It needed both hands to read.
-

(31) Which of the following is true?

- 1** Louis's invention became popular during his own lifetime.
- 2** The army's night-writing system was simple and easy to use.
- 3** Braille is now used by blind people around the world.
- 4** Louis gave up trying to improve reading for the blind.

ライティング（英文要約）

- 以下の英文を読んで、その内容を 45～55語 の英語で要約しなさい。● 原文の語句をそのまま写さず言い換えること。

Electric cars, which run on batteries instead of gasoline, are becoming increasingly popular in many countries around the world. Several governments are now encouraging people to switch from ordinary cars to electric ones.

This change has clear advantages. Most importantly, electric cars do not burn gasoline, so they produce no exhaust gases and help reduce air pollution. They are also much quieter than ordinary cars, which makes streets more pleasant and less noisy for the people who live nearby.

However, electric cars also have some weak points. For one thing, they are still quite expensive to buy, so not everyone can afford one. For another, there are not yet enough places to charge their batteries, which can make long trips difficult.

YOUR SUMMARY
