5

英検2級 一次試験（筆記） 最終総合模試 第5回

大問1～5 / 本番形式

THINKING 総合模試 | 本番そっくりの構成で実戦演習。

- ・ **大問1** 短文の語句空所補充（17問）／**大問2** 長文の語句空所補充（6問）
- ・ **大問3** 長文の内容一致選択（8問）／**大問4** 英文要約／**大問5** 意見論述
- ・ 解き終わったら **解答・解説編** で答え合わせと弱点確認を。

※ リスニングは音声が必要なため別途。本冊子は一次試験の筆記パートです。

1

次の (1) から (17) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

(1) Washing your hands often can _____ the spread of disease.

- 1 prepare 2 produce 3 prevent 4 provide

(2) Many strange _____ live deep in the ocean.

- 1 creatures 2 cultures 3 pictures 4 features

(3) The owner hopes to _____ his small business into other cities soon.

- 1 explain 2 expect 3 express 4 expand

(4) The children laughed as each soap _____ floated up into the bright sky.

- 1 battle 2 bubble 3 bundle 4 label

(5) Your application did not _____ all the conditions, so we cannot accept it.

- 1 simplify 2 specify 3 supply 4 satisfy

(6) The company offered a large _____ to anyone who found the missing dog.

- 1 regard 2 reward 3 record 4 reform

(7) The new machine greatly improved the _____ of the factory's production line.

- 1 emergency 2 frequency 3 efficiency 4 sufficiency

(8) Could you give me a _____ idea of how much this project will cost?

- 1 rich 2 rough 3 raw 4 ripe

(9) Every guest will be _____ a free breakfast and a map of the city at this hotel.

- 1 provided for 2 provided to 3 provided with 4 provided on

(10) He looks very strict, but _____ he is a kind and gentle person.

- 1 in advance 2 in reality 3 in time 4 in demand

(11) The new traffic rules are now _____, so everyone must follow them.

- 1 in advance 2 in common 3 in effect 4 in return

(12) A: It's already raining hard. Should we still go hiking today? B: No, let's _____ the trip until next weekend.

- 1 put off 2 put on 3 put up 4 put away

(13) We had to stop the car because we had _____ gas in the middle of the highway.

- 1 run into 2 run out of 3 run after 4 run over

(14) More than two hundred students decided to _____ the volunteer activity during the summer vacation.

- 1 take part in 2 take care of 3 take place 4 take after

(15) This is the museum _____ we visited when we traveled to Paris last year.

1 who

2 what

3 which

4 where

(16) If I _____ more free time, I would learn how to play the violin.

1 have

2 had

3 will have

4 have had

(17) A: The boy _____ by the window is my younger brother. B: Oh, he looks just like you!

1 stand

2 stood

3 standing

4 to stand

2

次の英文 [A], [B] を読み, その文意にそって (18) から (23) までの () に入れるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

A

A Useful Mistake

In 1968, a scientist named Spencer Silver was trying to make a very strong glue. The glue he created, however, (18): it could stick to surfaces but was easy to peel off without leaving a mark. At first, no one knew what to do with such a product.

Years later, another worker at the same company, Art Fry, sang in a church choir. He used small pieces of paper to mark the pages of his songbook, but they kept falling out. Then he remembered Silver's glue and realized that (19). He put a little of the glue on his paper markers, and they stayed in place without damaging the pages.

The company began selling these sticky notes, and they quickly became popular in offices and homes. (20), a glue once thought to be a failure became one of the most useful products in the world. Sometimes a mistake can lead to a great success.

- | | | | | |
|------|---|------------------------|---|------------------------|
| (18) | 1 | turned out to be weak | 2 | was extremely powerful |
| | 3 | disappeared completely | 4 | became very expensive |

- | | | |
|------|---|---|
| (19) | 1 | it had become dangerous |
| | 2 | the choir needed more singers |
| | 3 | it was perfect for making bookmarks that could be removed |
| | 4 | he should buy a new songbook |

- | | | | | |
|------|---|-------------|---|-------------|
| (20) | 1 | However | 2 | In this way |
| | 3 | By contrast | 4 | Until then |

B

How Trees Share Food

A forest may look like a group of trees standing alone, but under the ground, something surprising is happening. The roots of many trees are connected by thin threads of fungus. Through this hidden network, (21). Trees can actually send food, water, and even messages to one another.

Scientists have found that older, taller trees often share their extra sugar with younger trees that do not get enough sunlight. (22), if one tree is attacked by insects, it can send a warning through the network so that nearby trees can prepare to defend themselves.

Because of this underground system, a forest acts almost like a single living thing rather than a group of separate trees. Some scientists even call it the "wood wide web." Studying it has changed (23). People now understand that trees are far more connected and cooperative than anyone once believed.

- (21)
- 1

the trees are linked together
- 2

the trees grow apart
- 3

the soil becomes dry
- 4

the fungus dies quickly

- (22)
- 1

By contrast
- 2

However
- 3

Until then
- 4

Moreover

- (23)
- 1

the color of the leaves
- 2

how we think about forests
- 3

the price of wood
- 4

the speed of the wind

3

次の英文 [A], [B] の内容に関して、(24) から (31) までの質問に対して最も適切なもの、または文を完成させるのに最も適切なものを 1, 2, 3, 4 の中から一つ選びなさい。

A

From: Naomi Park, Human Resources <n.park@meridiancorp.com>

To: James Whitfield <j.whitfield@email.com>

Date: April 8

Subject: Your First Day at Meridian

Dear James,

Congratulations again on joining Meridian, and welcome to the team! Your first day will be Monday, April 15. I am writing to give you some information so that your first day goes smoothly. Please read this email carefully and let me know if anything is unclear.

On your first morning, please arrive at the main entrance at 9:00 a.m. and tell the receptionist that you are a new employee. She will call me, and I will come down to meet you. Please bring a form of photo identification and your bank details, which we need to set up your salary payments. You do not need to bring a laptop, as we will provide one for you.

In the afternoon, you will meet your team and have a short tour of the building. Don't worry about preparing anything special—the first day is mainly about helping you settle in. If, for any reason, you are running late on the day, just call my office number below. We're all looking forward to working with you. Best wishes, Naomi

(24) Why is Naomi writing to James?

- 1 To ask him to choose his starting date.
- 2 To give him information for his first day.
- 3 To offer him a position at the company.
- 4 To explain why his start has been delayed.

(25) On his first day, James needs to bring

- 1 an ID document and his bank account information.
- 2 his own laptop computer.
- 3 a copy of his work contract.
- 4 lunch for the whole team.

(26) What should James do if he is running late on his first day?

- 1 Send an email to the receptionist.
- 2 Wait until the afternoon to arrive.
- 3 Ask a team member to explain.
- 4 Call Naomi's office number.

B

Why Cities Are Hotter

On a hot summer day, a large city can be several degrees warmer than the countryside around it. Scientists call this difference the "urban heat island" effect. Even at night, when the countryside cools down, the city often stays warm. For people living in cities, this can make hot weather feel even more uncomfortable and, in some cases, dangerous.

There are several reasons why cities become so hot. One of the most important is the materials that cities are built from. Roads and buildings are usually made of dark concrete, brick, and asphalt. These dark surfaces absorb a lot of heat from the sun during the day and then release it slowly through the evening and night. Unlike soil or grass, they do not allow the ground to cool easily.

Cities also have far fewer trees and plants than the countryside. Plants help cool the air, both by providing shade and by releasing water from their leaves. With less greenery, cities lose this natural cooling. On top of this, the many cars, factories, and air conditioners in a city all give off heat of their own, making the problem even worse.

The urban heat island effect causes real problems. During very hot weather, it can put people's health at risk, especially the elderly and the very young. It also leads people to use their air conditioners more, which uses more electricity. Burning extra fuel to make this electricity can create more pollution and release more of the gases that warm the planet—so the problem feeds itself.

Fortunately, cities can take steps to cool down. Planting more trees and creating parks adds shade and natural cooling. Some cities are painting roofs white or covering them with plants, known as "green roofs," so that buildings absorb less heat. Using lighter-colored materials for roads can also help. By making changes like these, cities can become more comfortable and healthier places to live, even as summers grow hotter.

(27) What is the "urban heat island" effect?

- 1 A city being warmer than the countryside around it.
- 2 A city being colder at night than during the day.
- 3 An island that is warmer than the sea.
- 4 A type of summer storm over cities.

(28) Why do dark roads and buildings make cities hotter?

- 1 They block the wind from cooling the city.
- 2 They are usually covered in grass.
- 3 They reflect sunlight back into space.
- 4 They absorb heat by day and release it slowly.

(29) How do plants help cool the air?

- 1 They produce electricity for the city.
- 2 They give shade and release water from their leaves.
- 3 They absorb heat from cars and factories.
- 4 They make the city's roads darker.

(30) According to the passage, why does the heat island problem "feed itself"?

- 1** Because people plant more trees in hot weather.
 - 2** Because cities become cooler over time.
 - 3** Because using more air conditioning leads to more pollution and warming.
 - 4** Because people leave the city in summer.
-

(31) Which of the following is true?

- 1** Cities and the countryside are always exactly the same temperature.
- 2** Plants make cities hotter by blocking the wind.
- 3** Nothing can be done to cool down hot cities.
- 4** Painting roofs white can help buildings absorb less heat.

4

ライティング（英文要約）

- 以下の英文を読んで、その内容を 45～55語 の英語で要約しなさい。● 原文の語句をそのまま写さず言い換えること。

More and more people today buy ready-made meals from supermarkets and convenience stores instead of cooking from scratch. These prepared foods have now become a common and convenient part of many busy lives.

Such meals offer some clear benefits. The main one is that they save a great deal of time, since there is no need to shop for ingredients or cook. They also come in a wide variety, allowing people to enjoy many different dishes easily.

There are, however, some downsides. One is that ready-made meals are often less healthy, because they can contain a lot of salt, fat, or sugar. Another is that they tend to be more expensive than meals cooked at home, and they create extra packaging waste.

YOUR SUMMARY

語数（ 語）／目安 45～55語

5 ライティング（英作文）

● あなたの意見とその理由を 2つ 書きなさい。● 語数の目安は 80～100語。● TOPICからずれた解答は0点になることがあります。

TOPIC

Do you think people should use public transportation more often than cars?

POINTS

- ***The environment***
- ***Cost***
- ***Convenience***

YOUR ANSWER

語数 (語) / 目安 80~100語

[illegible]
